

The DiPrima Office, late 1970s

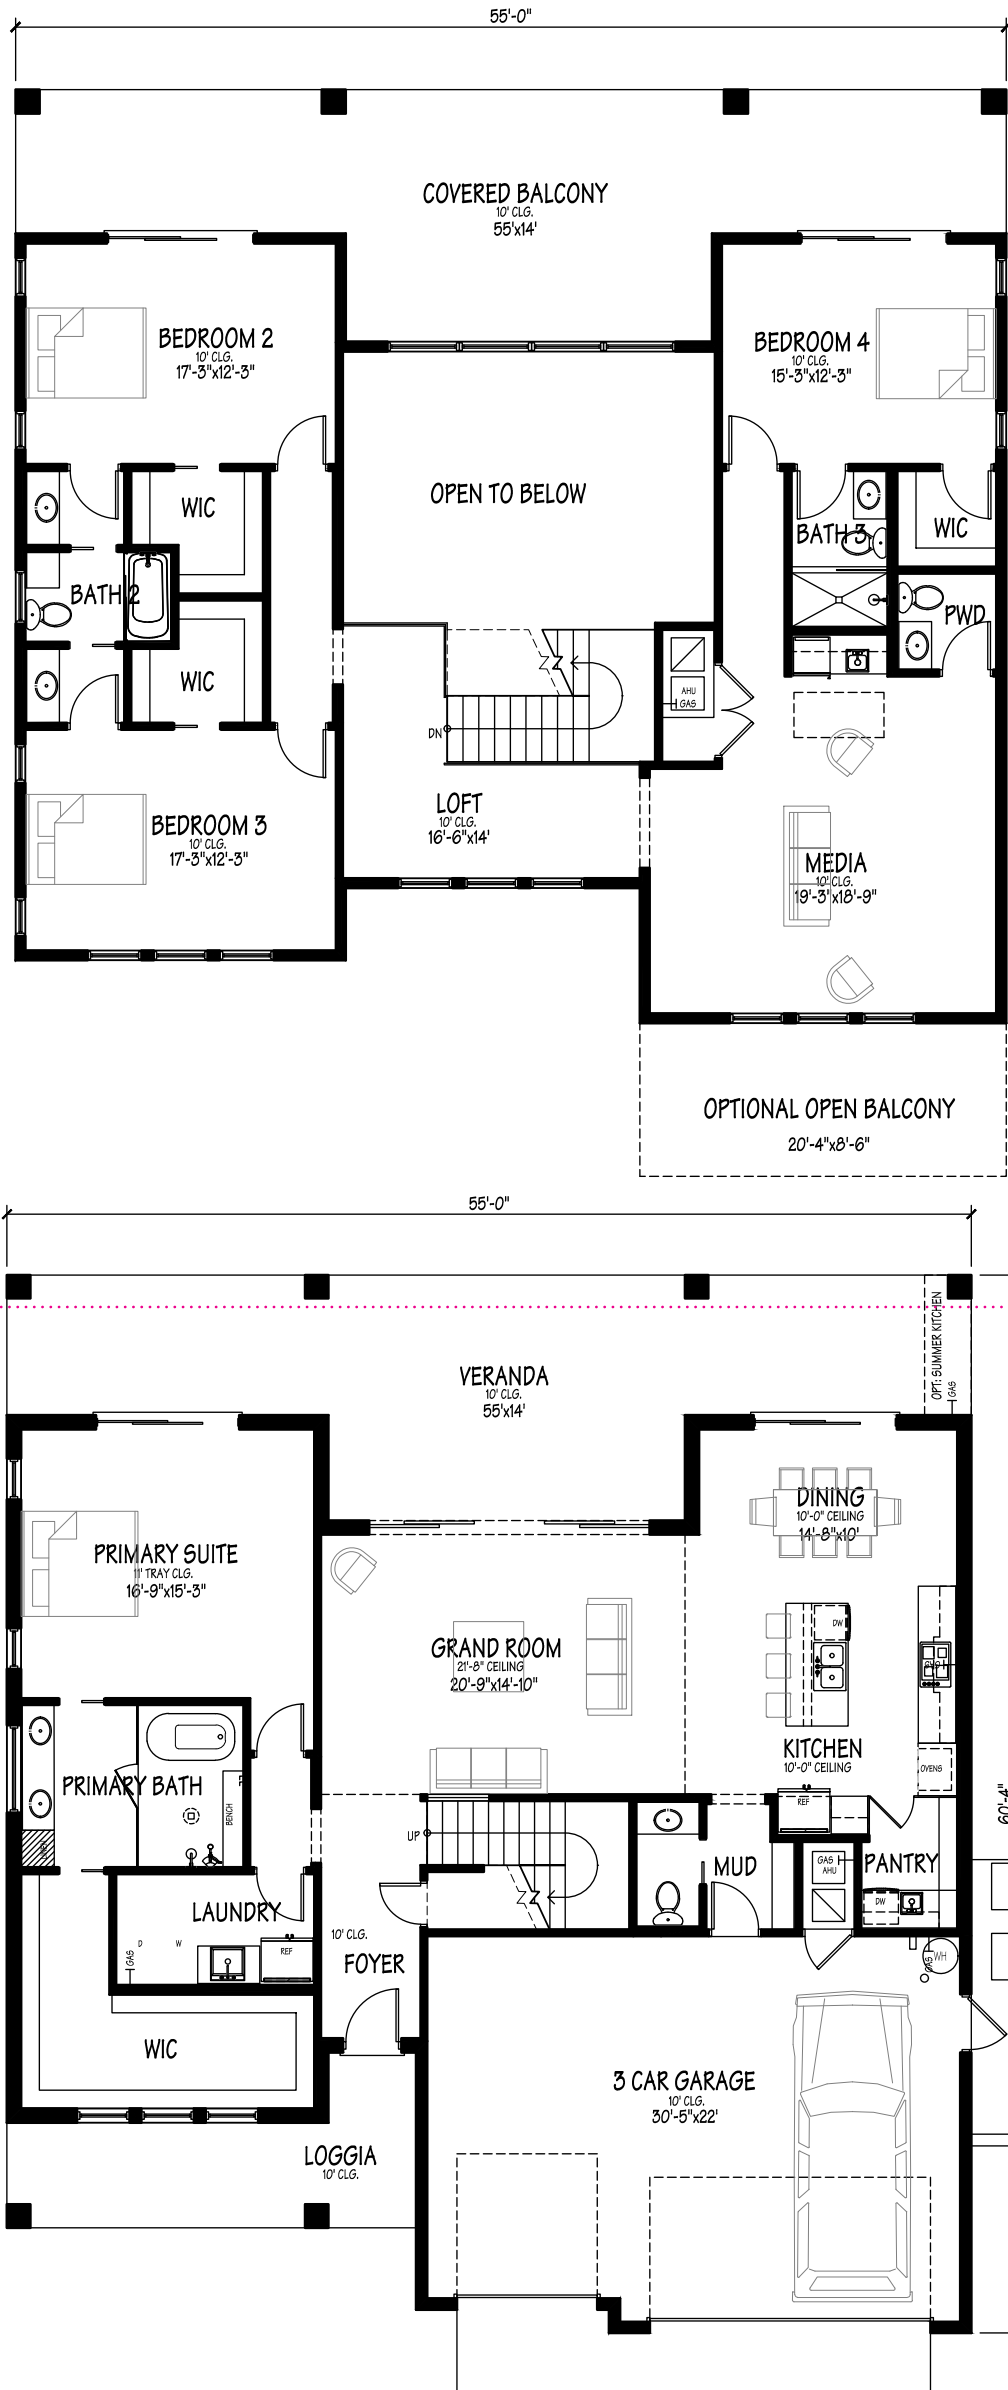

DiPrima started building on the Space Coast just as the Apollo Program was taking shape, constructing homes for the engineers and families arriving with it. Across the Indian River from The Shores at Tranquility, the Vehicle Assembly Building stands as a testament to Brevard's history and significance to our nation. We're proud of our story and would love to help you write yours.

Building Since 1961

Mediterranean Elevation
